DETAILED ACTION

1. Claims 1-21 are pending in the present application.

Drawings

2. The drawings are objected to because descriptive textual labels are needed for reference elements 174 and 176 for proper understanding of the drawings without referring to the disclosure [note figure 1]. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the following limitation is vague: "requesting at least one second set of update information responsive to at least a size of the first set of update information". The structural connection between this limitation and the updating the computer system responsive to at least the first set of update information is not clear.

The limitations of independent claim 8 and claim 15 parallel the limitation of claim 1; therefore they are rejected under the same rationale.

Regarding independent claims 5, 12 and 15 the following limitation is vague and unclear: "occasion". This meaning of the term is not clear; Applicant does not appear to use this term in the disclosure.

Claims 2-4, 6-7, 9-11, 13, 14, 16-18, 20 and 21 are rejected based on dependency.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujita (US Patent 5,386,553).

Fujita teaches a method of updating a computer system [note: "updating instructions" s10, figure 8], the method comprising:

receiving at least one first set of update information [note: col. 4 lines 62-68];

requesting at least one second set of update information responsive to at least a size of the first set of update information [col. 4 line 68 through col. 5 line 11; figure 3 note "amount of data information" 10] ; and

updating the computer system responsive to at least the first set of update information received [see: abstract; figure 8 note updating; col. 2 line 53 through col. 3 line 31; col. 3 line 32-52; col. 6 lines 20-27; col. 9 line 42 through col. 10 line 23].

Fujita teaches file updating in which the type of updating is responsive to the amount of data or file size.

7. Regarding claims 2 and 4:

(claim 2) wherein the updating step comprises deleting at least one set of information, said at least one set of information stored on the computer system prior to the receiving step, responsive to the first set of update information received [col. 8 lines 30-62; col. 7 lines 19-25].

(claim 4) wherein the requesting step is additionally responsive to a size of an area into which information may be stored [abstract; figure 3 note "amount-of-data information" (10); col. Col. 3 lines 45-52 "changing a size of the disk file according to the type of updating operation to be performed and the amount of data represented by the amount-ofdata information"].

8. Regarding claim 3:

receiving at least one third set of update information ... a difference in times between a performance of each of the receiving the third set of update information and the updating [note: Fujita teaches predetermined timing see col. 7 lines 25-35].

9. Regarding claims 5-7:

requesting on a first occasion a first set of update information for a first set of information responsive to a list comprising at least one identifier of the first set of information ... modifying the first set of information responsive to the first set of update information received ... [note: col. 2 lines 24-30; col. 2 line 53 through col. 3 line 31; col. 5 lines 12-35; col. 7 lines 19-25].

10. The limitations of computer program product claims 8-14 and system claims 15-21 parallel method claims 1-7; therefore they are rejected under the same rationale.

Conclusion
